mateusz.k.belka@gmail.com

PROFESSIONAL SUMMARY

AWS Cloud Engineer with four years of experience designing and managing scalable, event-driven cloud solutions. Holder of four AWS certifications including Professional-level credentials in architecture and security specialization. I have proven expertise in managing complex enterprise AWS infrastructure within highly regulated environments, specializing in Infrastructure as Code, serverless architectures, and automated compliance enforcement. Committed to delivering highly available and scalable cloud platforms through agile methodologies while continuously integrating emerging cloud innovations.

CERTIFICATIONS

AWS Certified Security - Specialty	June 2025
AWS Certified Solutions Architect - Professional	May 2024
AWS Certified Solutions Architect - Associate	May 2023
Microsoft Certified - Azure Fundamentals	Nov 2021

WORK EXPERIENCE

ABN AMRO Clearing | AWS, CDK, Python, Linux, CI/CD Feb 2022 - June 2025
AWS Cloud Engineer *Amsterdam, The Netherlands*

- Designed, built, and operated AWS Landing Zone solutions using serverless-first architecture
- Engineered and maintained secure, compliant AWS platform supporting 100+ accounts
- Leveraged CDK, Python, AWS CodePipeline to automate infrastructure delivery and management
- Implemented event-driven architecture to ensure organization-wide compliance with standards
- Designed Pub/Sub and Fanout queue patterns using SQS/SNS for scalable event-driven architecture
- Built risk controls for automated backups, EC2 patching, recovery testing for regulatory compliance
- Built automated AMI bakery for RHEL 9 using EC2 Image Builder with standardized hardening
- Created extensive unit tests for Infrastructure as Code using moto testing framework

CGI | AWS, Knowledge Sharing, Consulting, Community Building Sept 2021 - June 2025
Cloud Consultant *Amsterdam, The Netherlands*

- Conducted AWS knowledge sharing session for Cloud Development best practices
- Delivered consulting services to financial clients specializing in AWS infrastructure

spriteCloud | Ruby on Rails, Javascript, Cucumber June 2020 - Sept 2020
Fullstack Engineer *Amsterdam, The Netherlands*

- Applied agile development using Scrum framework in team-based environments
- Optimized front-end interfaces for responsive design across various screen formats
- Developed RESTful API integrations automating test suite workflows and database efficiency

SKILLS

Programming	Python, Moto, unittest, TypeScript, SQL, YAML, Bash
DevOps & Tools	Infrastructure as Code, CI/CD, Git, Linux, Splunk, Aquasec, ServiceNow
AWS Services	EC2, Lambda, Step Functions, GuardDuty, Security Hub, IAM, S3, SQS, SNS

EDUCATION

Vrije Universiteit Amsterdam July 2021
B.Sc. Computer Science *Data Science Minor*
